20 April 2022

i.e. Pest control services

Freshness First has two pack houses and is for 10 months of the year in production. We are a deciduous- and citrus fruit export company.

We comply to the BRCS standard, and one of the main points in the standard is good pest control. We contacted Geo Pest during January 2022, and within three weeks, the service agreements were signed, and their pest control system was implemented at both pack houses.

Pest activities were found while Geo Pest was busy replacing old bait stations in one of the pack houses. They came weekly to monitor the activity and continued with it until no activity was observed for three visits.

All bait stations are monitored monthly. Any pest activities between services, can be reported to a hotline, and Geo Pest will attend immediately to the problem.

The change from our previous pest control company to Geo Pest, was for sure a very good change. All staff members are friendly and competent in their work. The monthly reports are available at the end of the service.

I will recommend Geo Pest to any company, especially in the food industry, for the professional way of doing their job, is outstanding.

Your sincere

ST de Wet
